PROJECT PROPOSAL

Group - 42 CS

Details of Project Supervisor, Co-supervisor, Advisors, and Clients

Proposed Project Supervisor (Academic Staff of UCSC):

Name of the supervisor: Dr. R. A. Y. S. Ranasinghe

Signature of the supervisor:  27/06/2025

Date: 27/06/2025

Proposed Project Co-Supervisor (Assigned by Course Coordinator):

Name of the co-supervisor: Mr. D.A.M. Wanduragala

Signature of the co-supervisor:

Date : 27.06.2025

The client of the Project:

Name of the client: Dr. R. A. Y. S. Ranasinghe

Address of the client: UCSC Building Complex, 35 Reid Avenue, Colombo 07.

The contact number of the contact person: 071 767057211

e-mail address of the contact person: ysr@ucsc.cmb.ac.lk

1 Introduction to the Project

The Sri Lankan drama and theater industry lacks a centralized, digital platform to connect directors, artists, production managers, and service providers. Currently, communication and scheduling are handled via scattered channels like social media, phone calls, and physical meetings, which can cause inefficiencies. This project aims to bridge that gap by creating a comprehensive Drama Connectivity Platform.

1.1 Identified Problem - Reduction of Stage Drama Popularity and Talent Connectivity Gaps

In recent years, the popularity and audience engagement of Sri Lankan stage dramas have declined significantly. One of the key reasons behind this issue is the decreasing quality and visibility of stage productions. Upon further analysis, and through a discussion held with the Director of Sudarshi (Sinhala Cultural Center) — a key hub for the local drama community — it has been identified that the root cause lies in the lack of connection between talented artists and genuine opportunities.

Many skilled and aspiring actors in Sri Lanka struggle to find credible platforms to showcase their talent. At the same time, directors face difficulties in discovering reliable, talented artists and connecting with essential service providers such as lighting, costume, or makeup professionals. This gap in communication and visibility has directly impacted on the quality of production, leading to less appealing performances and reduced audience turnout.

Furthermore, the absence of a centralized system leads to inefficient planning, weak collaboration, and a lack of trust among stakeholders in the theater industry.

1.2 Proposed Solution - A Collaborative Drama Connectivity Platform

To address the growing disconnect and inefficiencies in the drama production ecosystem, we propose the development of a web-based Drama Connectivity Platform. This platform will serve as a trusted and professional digital space where:

- Artists can create portfolios, apply for roles, accept or reject role requests and gain visibility.
- Directors can easily search, review, and send role requests to suitable artists or publish the opportunity publicly, then choose a suitable candidate and schedule rehearsals/interviews.
- Production managers can book theaters and coordinate services
- Service providers can publish their services & manage their availability and respond to booking requests
- Audiences can receive timely updates, view shows, and provide feedback
- Admins can maintain the overall integrity and quality of the platform by managing users and approvals

By improving accessibility, transparency, and trust between drama industry stakeholders, this system will enhance production quality, support emerging talent, and help revive interest in Sri Lankan stage dramas among the public.

2 Project Goal

The goal of our project is to develop an integrated web-based platform to support and modernize the way stage drama productions are managed in Sri Lanka. We aim to achieve the following key objectives through this system:

- Create a centralized platform that connects directors, artists, service providers, and theater owners in one place, making communication and coordination easier and faster.
- Allow directors to manage drama productions, request artists for roles, schedule rehearsals, and plan interview slots through a user-friendly interface.
- Help artists create professional profiles, upload their portfolios, and apply for roles, giving them more visibility and a better chance to work in good productions.
- Enable production managers to view available theaters and services, make bookings, and manage schedules, all in one system, reducing the need for manual follow-ups.
- Support service providers and theater owners in maintaining their profiles, updating availability, and accepting or rejecting booking requests.
- Keep audiences informed by providing updates about upcoming dramas and providing a space to rate and review shows.
- Provide a secure and manageable environment through an admin panel that handles user accounts, permissions, and platform monitoring.

By achieving these goals, our system will not only improve the quality of drama productions but also create more opportunities for talented artists and help revive the stage drama culture in Sri Lanka.

3 Scope of the Project

3.1 In Scope

The following features and functions will be included in the system:

- **User Registration and Profile Handling** for artists, directors, service providers, theater owners, production managers, and audience members. NIC will be used to verify accounts and reduce the creation of fake profiles.
- **Drama Creation:** Artists can create a Drama profile by supplying the Public Performance Board Certificate issued for their script which will ensure the verification of drama production. Then he becomes the Director of that drama profile.
- **Drama Production Handling:** Directors can edit, manage drama production details and send notifications to the crew.
- **Artist Role Assignment:** Directors can search and send a request to artists available for production or publish vacancies publicly then choose a suitable candidate from the applicants.
- **Rehearsal and Interview Scheduling:** Directors can manage rehearsal dates and organize casting interviews using the calendar.
- **Service Requests:** Production managers can view available Service providers (e.g., Theaters, Lighting, Makeup, and Sound Equipment) and send booking requests for available dates. Service providers can accept or reject requests.
- **Audience Interaction:** Audiences can view ongoing dramas, rate dramas, and give feedback.
- **Admin Panel:** For managing user accounts, verifying profiles, approving services, and maintaining platform integrity.
- **Class Creation:** Artists can create training classes for students and other artists.

3.2 Out of Scope

- **Multilingual Support:** Only English language will be used in the system's first version. For ease of the users we are providing Sinhala language in future versions.
- **Artist Workshops Handling:** handling classes and workshops created by users through the system.

4 Objectives of the Project

4.1 Connecting Artists and Directors Effectively

The system can provide a central platform where directors can easily discover talented artists based on their profiles, portfolios, and availability, solving the current gap in artist discovery.

4.2 Providing a Trustworthy Platform for Artists

Artists can showcase their talents through verified profiles and apply for roles confidently, helping them reach genuine directors and production opportunities.

4.3 Simplifying Drama Production Handling

Directors can create production profiles, hire proper artists for roles, and manage rehearsal and interview schedules within one platform, streamlining the entire drama creation process.

4.4 Streamlining Service Bookings

The system will help production teams view and book theater spaces and connect with service providers (e.g., Makeup, Lighting, Costume), all from a single interface.

4.5 Admin-Controlled System Management

Admins will have tools to manage user roles, permissions, and system content to ensure trust, security, and a smooth user experience.

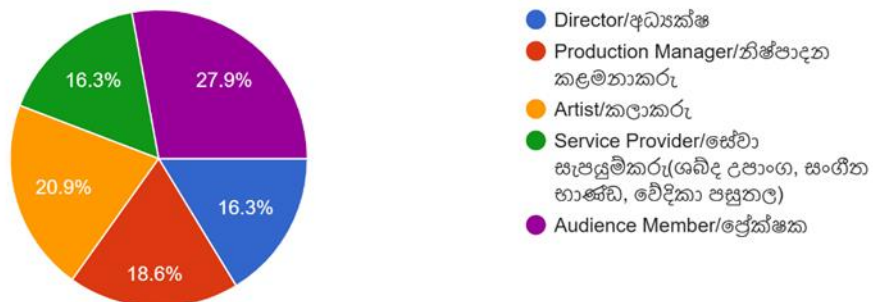

5 Project Feasibility

5.1 Social Feasibility

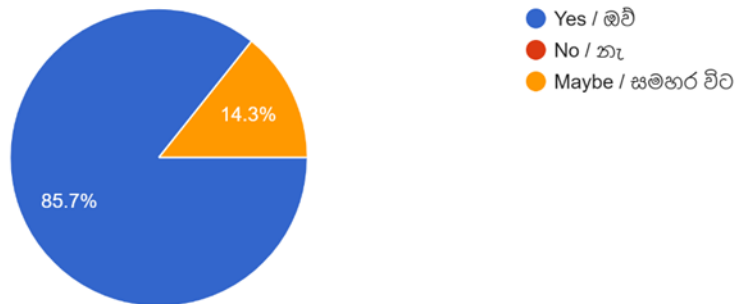

Drama and performing arts have long been integral to Sri Lankan culture. However, the stage drama community often faces challenges in collaboration, logistics, and promotion due to a lack of centralized platforms. Through surveys conducted with over 80 individuals and consultations with experienced drama directors and actors, we identified strong support for a digital system to streamline casting, coordination, and access to services.

Survey results revealed that:

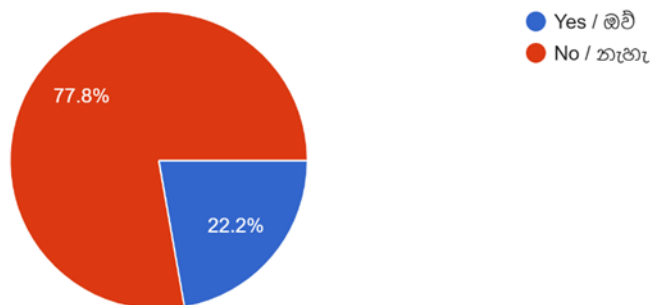

What is your role in the drama/theater community? / නාට්‍යයක් තුළ ඔබගේ භූමිකාව කුමක්ද?

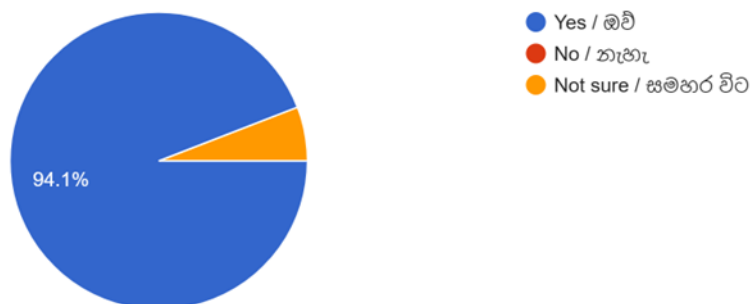

(10) Would a centralized system to manage artists and schedules help your workflow? / ඔබගේ කලා කටයුතු කළමනාකරණයට සැකසූ පද්ධතියක් නිඛිම පිළිබඳ ඔබේ අදහස කුමක් ද?

(03) Do you currently have a reliable method to stay informed about available casting roles in upcoming productions? / නව රංගන අවස්ථාවන් ...නිමට ඔබට දැනට නිවැරදි ක්‍රමවේදයක් පවතීද?

(05) Would you prefer a portal that lets you view available theaters and book them online? / පවතින සිනමාහල් බැලීමට සහ ඒවා අන්තර්ජා...නිමට ඔබට ඉඩ සලසන යෙදවුමකට ඔබ කැමතිද?

5.2 Technical Feasibility

The proposed solution will be implemented as a web-based platform using:

- **Frontend:** HTML / CSS
- **Backend:** PHP
- **Database:** MySQL

All tools and technologies selected are open-source or have free tiers suitable for development and testing. Team members possess prior experience or are currently gaining the technical skills necessary to build the system. Thus, it is technically feasible within the given time and skill constraints.

5.3 Operational Feasibility

The system is intended to be intuitive and usable without requiring special training. It will serve the following actors:

- **Artists:** Can register, maintain profiles, apply for roles, and create drama projects.
- **Directors:** Can verify dramas with a certificate, appoint managers, and conduct casting.
- **Production Managers:** Handle theater bookings, service provider coordination, etc.
- **Service Providers:** List services and products with rates and availability.
- **Audience:** Can view showtimes (ticketing is currently out of scope).

Given that artists and directors already use digital platforms for communication, introducing Rangamadala will streamline operations rather than complicate them. The system only requires internet access and basic digital literacy.

5.4 Economic Feasibility

- **Development Cost:** Zero – carried out by a university project team.
- **Hosting and Domain:** Initially free (free tier hosting platforms);
- **Software and Tools:** Open-source technologies such as Visual Studio Code and GitHub
- **Scalability:** As the user base grows, only marginal cost increases are expected for hosting, which are manageable.

Overall, Rangamadala is economically feasible within a student project budget.

5.5 Legal and Ethical Feasibility

- All dramas must be verified using a valid certificate from the Public Performance Board, ensuring regulatory compliance.
- Users' data (artist profiles, certificates, etc.) will be stored securely, and proper terms of use will be drafted.
- Any future online payments will comply with the payment gateway provider's terms and local e-commerce laws.
- Artists' consent will be required before public display or recruitment.

No existing laws are violated by the proposed features, making the project legally and ethically feasible.

5.6 Schedule Feasibility

The project spans approximately 30 weeks. Based on our project plan:

- **Requirement gathering and design** are near completion.
- **Development and testing** phases are well planned with buffer periods.
- **Estimated man-hours:** approximately 1200 hours, distributed among 4 group members.

Weekdays working hours = 5 hours

Weekend working hours = 5 hours

Number of group members = 4

Number of weeks = 30

Total man-hours = (5 hours + 5 hours) * 4 members * 30 weeks = 1200 hours

Given the current progress and scope, Rangamadala is highly feasible to complete within the schedule.

6 Deliverables of the Project

- **Web-Based Drama Connectivity Platform:**
A fully functional and user-friendly web platform that connects directors, artists, service providers, production managers, and the audience.
- **Source Code:**
The complete source code of the developed system, including frontend, backend, and database components, is organized and documented for future maintenance or enhancement.
- **Project Report:**
A comprehensive report detailing the project background, objectives, methodology, system design, implementation, testing, and conclusions.
- **User Guide:**
A simplified, easy-to-follow manual that explains how each type of user (e.g., director, artist, audience) can use the system effectively.

7 Project Constraints and Assumptions

7.1 Constraints

- Artists, directors, production managers, service providers, and audience members will have role-based access, restricting each to actions relevant to their responsibilities
- Artists must upload a valid Public Performance Board certificate before creating a drama profile.
- The system functionality will focus on artist and drama coordination, logistics handling, and service provider hiring.
- The platform must securely integrate a trusted third-party payment gateway to handle payments. The system itself will not store sensitive card information.
- Online payments must comply with applicable data protection and security standards (e.g., SSL encryption).
- The project must be developed using only allowed web technologies (HTML, CSS, JavaScript, PHP, MySQL) without third-party frameworks, following academic constraints.

7.2 Assumptions

- All users (artists, directors, production managers, service providers, audience) will have reliable internet access and a modern browser
- Users will provide truthful and complete information during registration, drama submission, and service listing.
- Directors will submit authentic Public Performance Board certificates for verification.
- Service providers will regularly update their service details and availability to avoid booking conflicts.
- Audience members will use valid payment methods and enter accurate billing details when purchasing dramas.
- The integrated payment gateway will provide reliable, secure transaction processing and clear payment status notifications to the system.
- System administrators will verify new user registrations, drama certificates, and service provider profiles promptly.
- It is assumed that venues, artists, and service providers are sufficiently available locally to support the expected demand for stage drama productions.

8 Requirements

8.1 Functional Requirements

8.1.1 Director

- Create and update the user profile.
- Edit and delete drama productions.
- View available artists and send role requests.
- Publish vacancies.
- Schedule rehearsals and view rehearsal calendars.
- Schedule and manage interview slots for casting.

8.1.2 Production manager

- Create and update user profile.
- View available theaters and book them for rehearsals or shows.
- Request & book services from registered service providers.
- Accept/reject drama bookings.

8.1.3 Service Providers

- Register and create their service profiles.
- Update their availability calendar.
- Accept or reject incoming service requests.
- Handle payments for accepted service requests and update payment status.

8.1.4 Artists

- Register and maintain personal and professional profiles.
- Apply for open roles in productions.
- Upload portfolios (images, videos, resumes).
- View their assigned roles and rehearsal schedules.
- Send notifications to artists about interviews or updates.
- Create classes
- Enroll in classes

8.1.5 Audience

- Rate and give feedback on dramas they have watched.
- Book drama showings.
- Enroll in classes

8.2 Use Case Diagrams

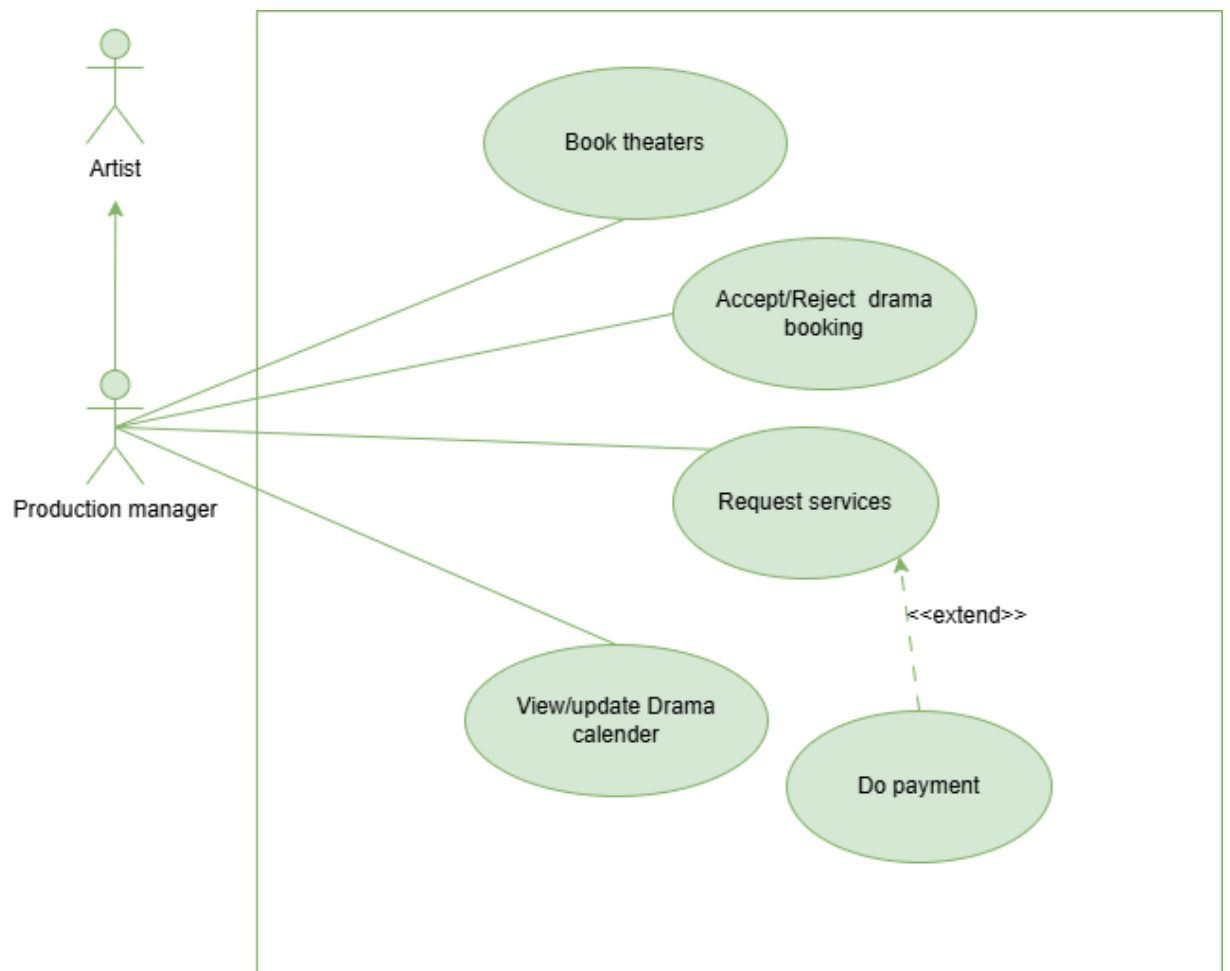

8.2.1 Admin

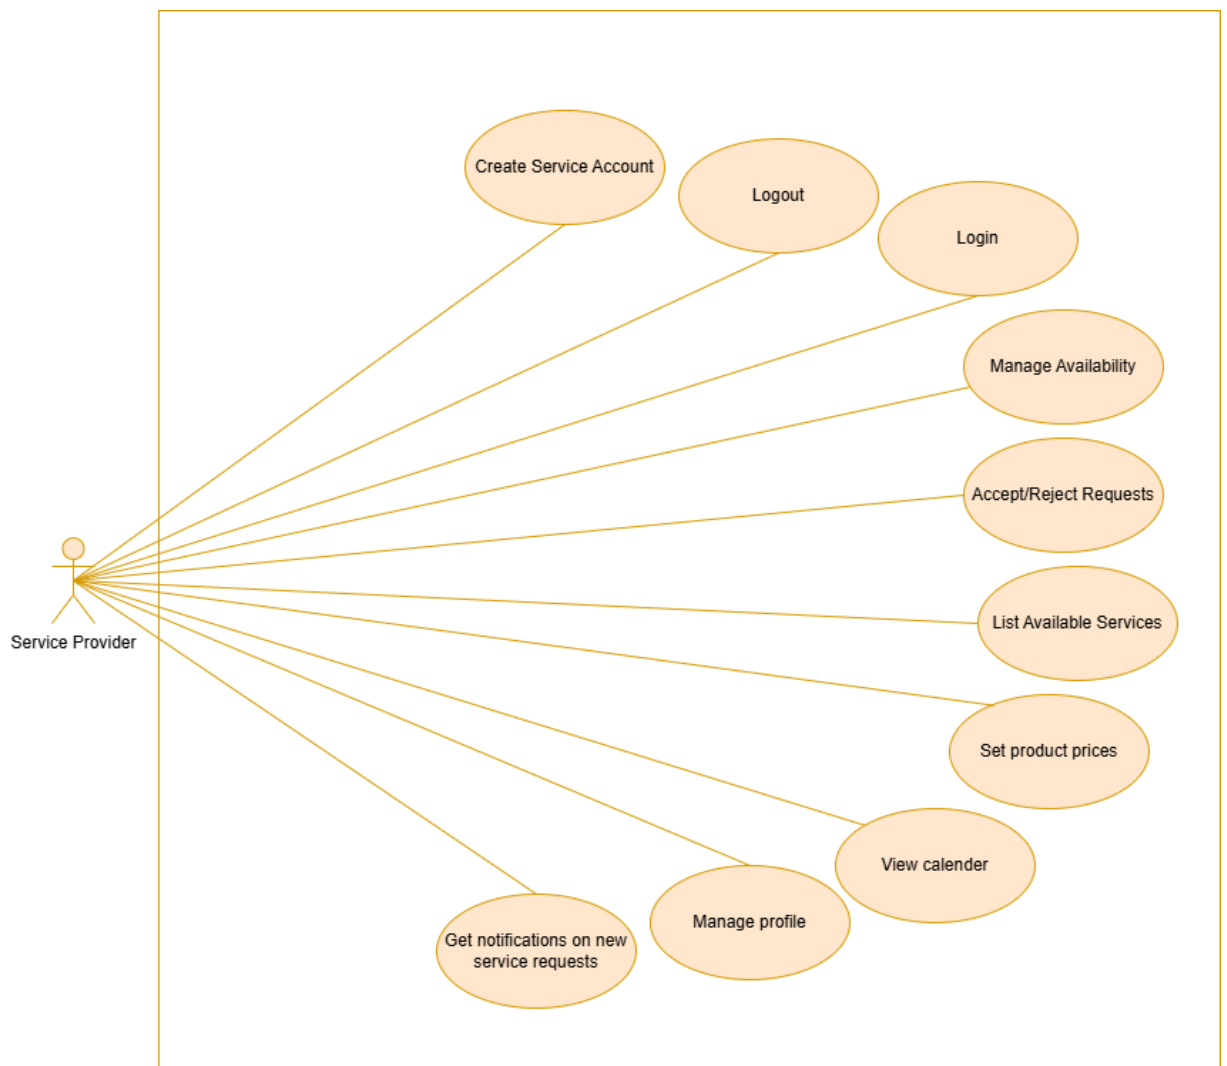

8.2.2 Director

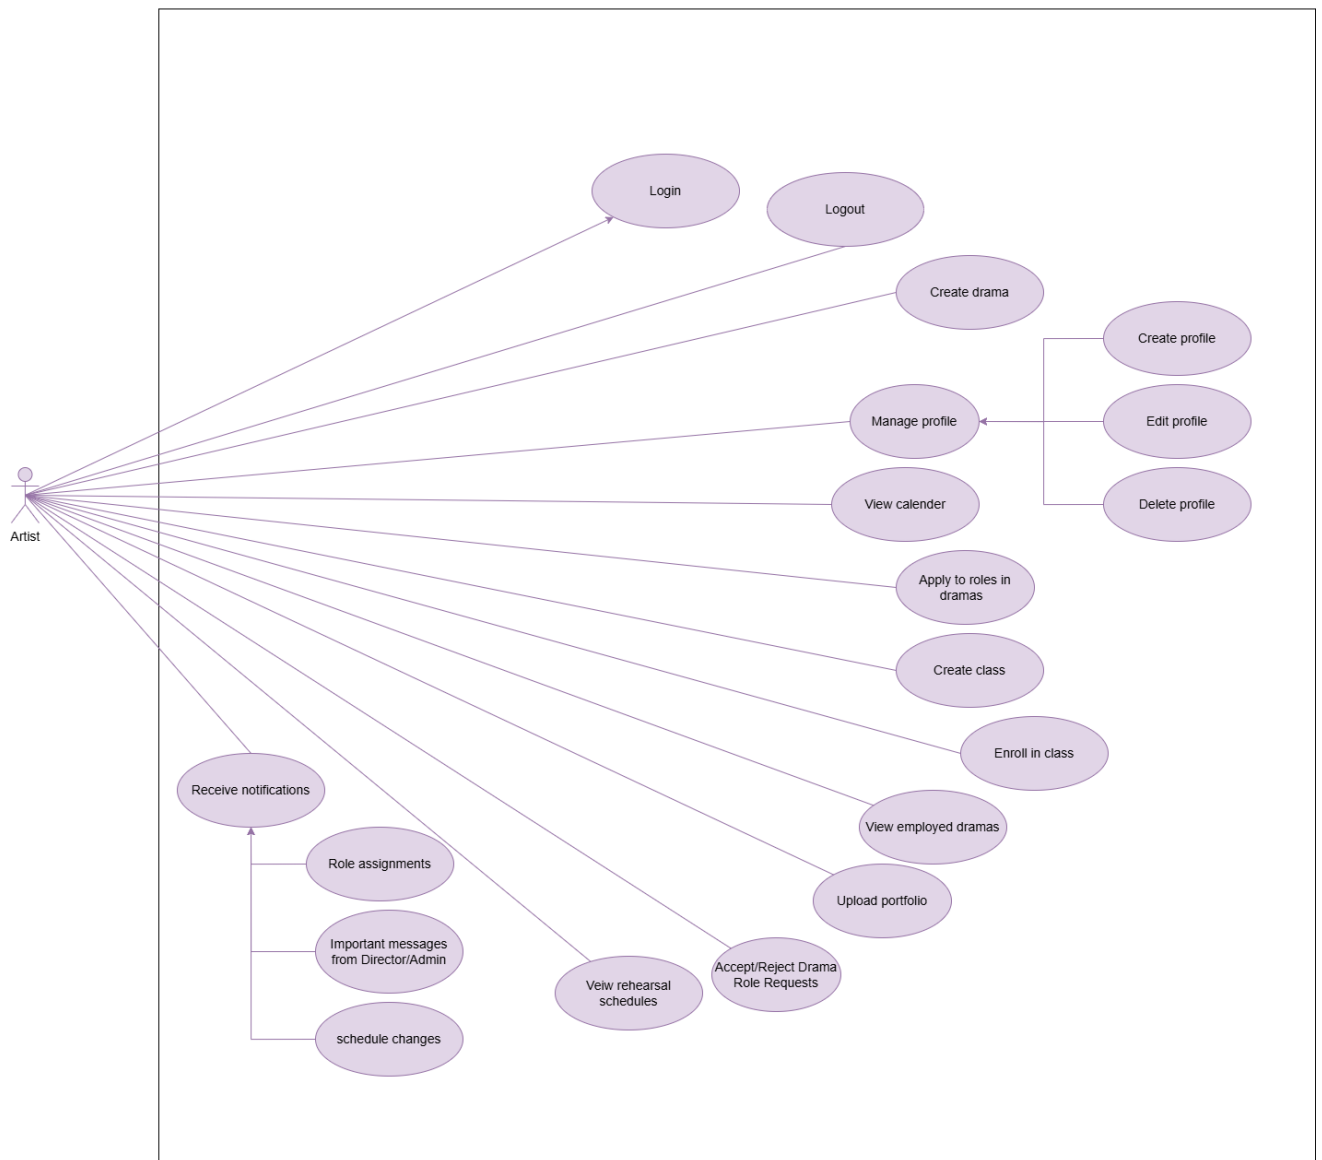

8.2.3 Production Manager

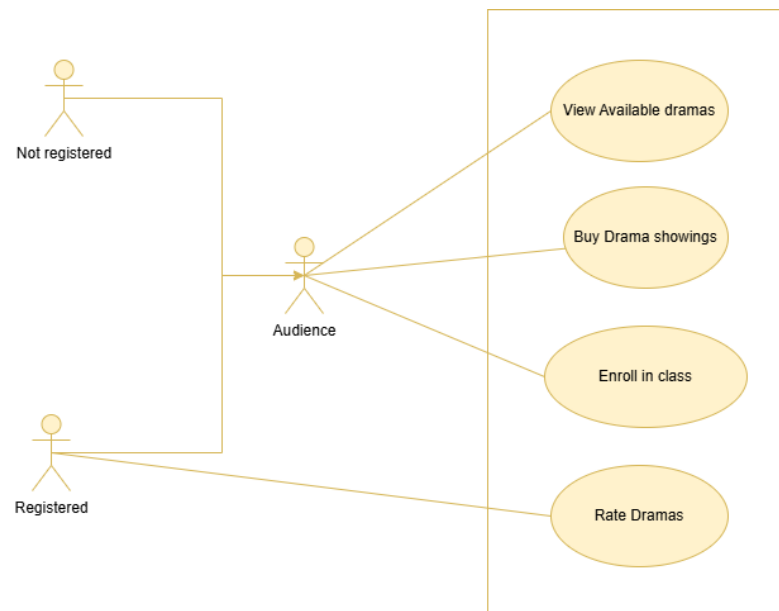

8.2.4 Service Providers

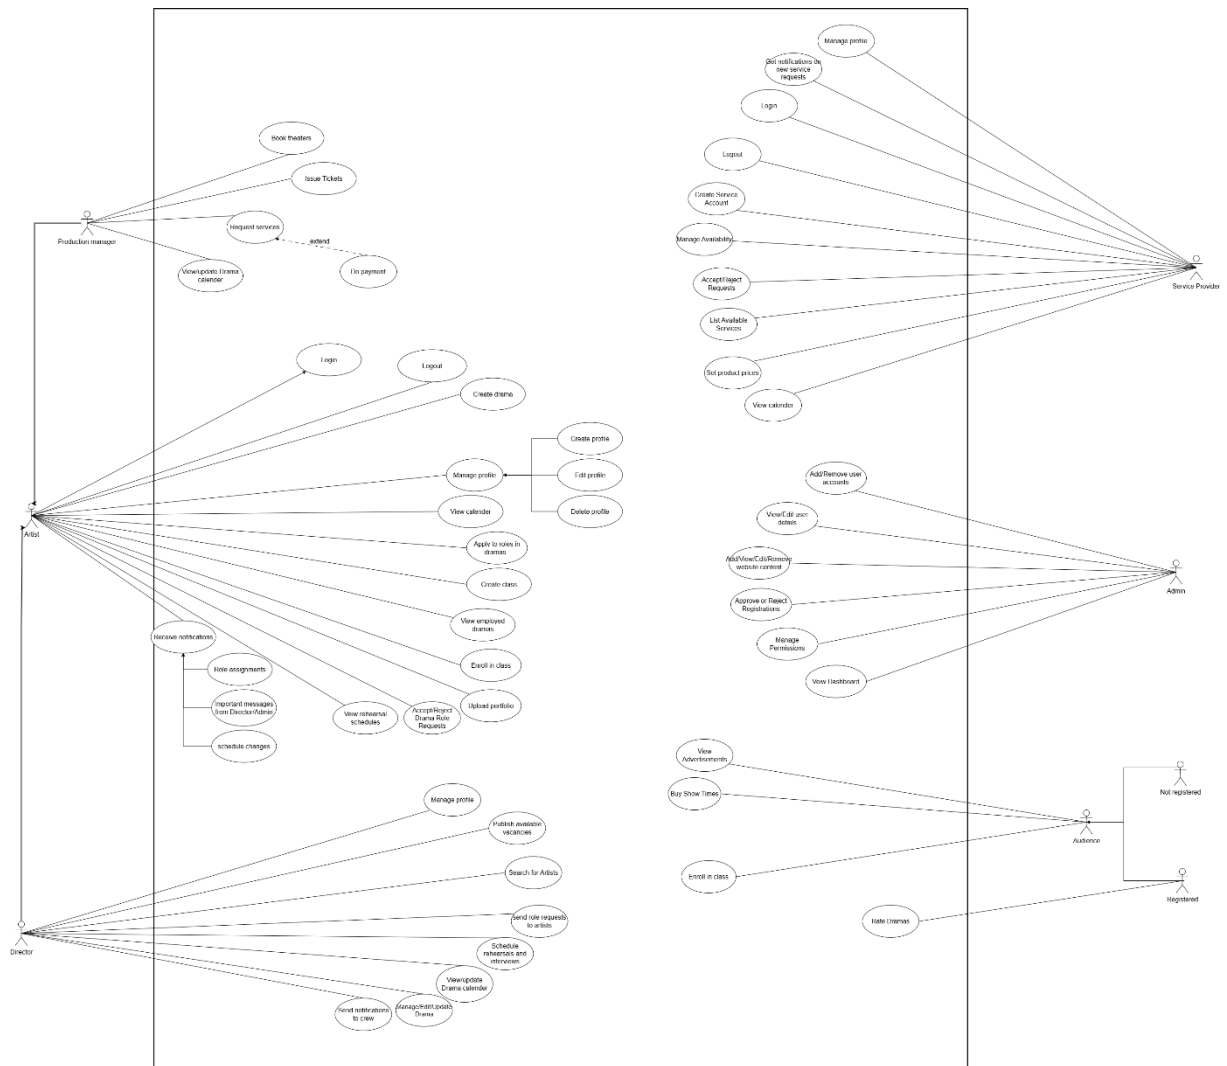

8.2.5 Artist

8.2.6 Audience

8.2.7 Full Use Case Diagram

Can view the full use case diagram [here](#).

8.3 Use Case Descriptions

8.3.1 Admin

Use Case ID	ADM-01
Use Case Name	Add/Remove User Accounts
Primary Actor/s	Admin
Description	Admin manages user accounts
Pre-Conditions	Admin is logged in
Main Scenario	1. Admin navigates to the “User Management” section. 2. Admin chooses to add or remove a user. 3. For adding: a. Admin clicks “Add User.” b. Enters necessary details (e.g., name, email, role). c. Submits the form. 4. For removing: a. Admin selects a user from the list. b. Clicks the “Remove” button. c. Confirms the deletion. 5. The system validates the action and updates the user list.
Exceptions	1. Invalid user details
Post Conditions	User list updated

Use Case ID	ADM-02
Use Case Name	View/Edit User Details
Primary Actor/s	Admin
Description	Admin views and edits user profiles
Pre-Conditions	Admin is logged in
Main Scenario	1. Admin opens the “User Management” section. 2. Admin selects a user from the list. 3. Admin clicks the “Edit” option. 4. System displays the user’s profile information. 5. Admin modifies necessary fields. 6. Admin submits the changes. 7. System validates and saves the updates
Exceptions	Invalid content format
Post Conditions	Website content updated

Use Case ID	ADM-03
Use Case Name	Manage Website Content
Primary Actor/s	Admin
Description	Admin adds or modifies content
Pre-Conditions	Admin is logged in
Main Scenario	1. Admin navigates to the content. 2. Admin selects to create, edit, or delete content. 3. Admin fills or updates content fields. 4. Admin submits the action. 5. System validates the input. 6. System updates the content repository. 7. A confirmation message is shown.
Exceptions	Invalid content format
Post Conditions	Website content updated

Use Case ID	ADM-04
Use Case Name	Approve/Reject Registrations
Primary Actor/s	Admin
Description	Admin reviews new registrations
Pre-Conditions	Pending requests exist
Main Scenario	1. Admin goes to the “Pending Registrations” section. 2. System displays a list of unapproved users. 3. Admin selects a request to review. 4. Admin chooses to approve or reject the request. 5. System updates the user's status. 6. Notification is sent to the user.
Exceptions	None
Post Conditions	Registrations processed

Use Case ID	ADM-05
Use Case Name	Manage Permissions
Primary Actor/s	Admin
Description	Admin configures user roles
Pre-Conditions	Admin is logged in
Main Scenario	1. Admin navigates to the “Permissions” section. 2. Admin selects a user. 3. Admin updates the user’s role or permissions. 4. Admin submits the changes. 5. System validates and applies the updates.
Exceptions	Unauthorized changes
Post Conditions	Permissions updated

Use Case ID	ADM-06
Use Case Name	View Dashboard
Primary Actor/s	Admin
Description	Admin sees metrics and the overview
Pre-Conditions	Admin is logged in
Main Scenario	1. Admin logs in and is directed to the dashboard. 2. Dashboard loads real-time metrics (e.g., user count, active dramas).
Exceptions	Data fetch error
Post Conditions	Dashboard displayed

8.3.2 Director

Use Case ID	DIR-01
Use Case Name	Manage Profile
Primary Actor/s	Director
Description	Director manages profile details
Pre-Conditions	Director is logged in
Main Scenario	1. Director accesses their profile page. 2. Director clicks "Edit Profile." 3. Editable fields are displayed. 4. Director updates desired fields. 5. Director submits the changes. 6. System validates the input. 7. If valid, the profile is updated. 8. A success message is shown.
Exceptions	Unauthorized access
Post Conditions	Profile is updated

Use Case ID	DIR-02
Use Case Name	Search for Artists
Primary Actor/s	Director
Description	Search and browse available artists
Pre-Conditions	Artists must be registered
Main Scenario	1. Director opens the artist search page. 2. Director enters search criteria (e.g., gender, age, experience). 3. Director clicks "Search." 4. System filters and displays matching artists. 5. Director browses through the result list.
Exceptions	No artists found
Post Conditions	Search results shown

Use Case ID	DIR-03
Use Case Name	Send Role Requests
Primary Actor/s	Director
Description	Invite artists to roles
Pre-Conditions	Drama exists
Main Scenario	1. Director opens a drama profile. 2. Director selects “Send Role Requests.” 3. System displays a list of available artists. 4. Director selects one or more artists for roles. 5. Director sends the role invitation. 6. System notifies selected artists.
Exceptions	Artist already invited
Post Conditions	Invitation sent

Use Case ID	DIR-04
Use Case Name	Schedule Rehearsals
Primary Actor/s	Director
Description	Organize rehearsal sessions
Pre-Conditions	Artist roles are assigned
Main Scenario	1. Director navigates to the “Rehearsal Schedule” section. 2. Director selects date, time, and location. 3. Director adds relevant cast or crew. 4. Director saves the schedule. 5. System validates and adds the event. 6. Notifications are sent to all participants.
Exceptions	Date conflict
Post Conditions	Schedule created

Use Case ID	DIR-05
Use Case Name	Update Drama Calendar
Primary Actor/s	Director
Description	Update the drama's timeline
Pre-Conditions	Drama exists
Main Scenario	1. Director opens the drama calendar. 2. Director adds or edits an event. 3. Director enters event details (title, time, description). Director submits the update. 4. System validates for time conflicts. 5. If valid, changes are saved and displayed.
Exceptions	Overlapping events
Post Conditions	Calendar updated

Use Case ID	DIR-06
Use Case Name	Manage Drama
Primary Actor/s	Director
Description	Modify drama details
Pre-Conditions	Drama exists
Main Scenario	1. Director navigates to the drama dashboard. 2. Director selects “Edit Drama Info.” 3. Director updates relevant fields. 4. Director submits the form. 5. System validates input. 6. If valid, changes are saved. 7. A success message is displayed.
Exceptions	Validation errors
Post Conditions	Drama updated

Use Case ID	DIR-07
Use Case Name	Send Notifications
Primary Actor/s	Director
Description	Notify the crew about updates
Pre-Conditions	Crew exists
Main Scenario	1. Director navigates to the “Notifications” section. 2. Director composes a message. 3. Director selects recipients (individuals or groups). 4. Director sends the notification. 5. System sends messages via the selected method (in-app, email, etc.).
Exceptions	Message failure
Post Conditions	Notification sent

Use Case ID	DIR-08
Use Case Name	Publish Available Vacancies
Primary Actor/s	Director
Description	Allows the Director to publish available roles or crew positions for upcoming drama productions.
Pre-Conditions	Drama project exists and has vacant roles
Main Scenario	1. Director navigates to the “Vacancies” section. 2. Director clicks on “Add New Vacancy.” 3. Director enters vacancy details (role, description, required skills, deadline). 4. Director selects visibility (public or internal). 5. Director publishes the vacancy. 6. System displays confirmation and lists the vacancy.
Exceptions	1. Missing required fields 2. Failure to save vacancy
Post Conditions	Vacancy is listed and visible to selected users.

8.3.3 Production Manager

Use Case ID	PM-01
Use Case Name	Book Theaters
Primary Actor/s	Production Manager
Description	Reserve venue for drama
Pre-Conditions	Available slots exist
Main Scenario	1. Production Manager logs into the system. 2. Navigates to the Theater Booking section. 3. Searches available venues based on date and location. 4. System displays a list of available theaters. 5. Production Manager selects a theater. 6. Enters booking details (date, time, duration). 7. Confirms and submits the booking request. 8. System notifies the selected theater. 9. Theater confirms or rejects the request. 10. Status is updated in the system.
Exceptions	Venue unavailable
Post Conditions	Venue is booked

Use Case ID	PM-02
Use Case Name	Request Services
Primary Actor/s	Production Manager
Description	Hire logistics services
Pre-Conditions	Service providers exist
Main Scenario	1. Production Manager navigates to Service Providers. 2. Searches or browses available service providers by category. 3. Selects a provider from the list. 4. Reviews provider profile and availability. 5. Sends a service request with date and service description. 6. System notifies the selected provider. 7. Provider confirms or rejects the request. 8. Status is updated in the system.
Exceptions	Provider unavailable
Post Conditions	Provider hired

Use Case ID	PM-03
Use Case Name	Accept/Reject drama bookings
Primary Actor/s	Production Manager
Description	Respond to drama booking requests
Pre-Conditions	Drama booking request exist
Main Scenario	1. Production manager navigates to drama requests. 2. View the list of pending drama requests. 3. Clicks a request to see details. 4. Clicks “Accept” or “Reject.” 5. System updates request status and notifies the User.
Exceptions	None
Post Conditions	Request Handled

Use Case ID	PM-04
Use Case Name	Do Payment
Primary Actor/s	Production Manager
Description	Complete transaction
Pre-Conditions	Invoice or amount known
Main Scenario	1. Production Manager navigates to services section. 2. Selects the service to pay for. 3. Enters payment method and details (card, bank transfer, etc.). 4. Confirms and submits the payment. 5. System processes the transaction. 6. On success, payment receipt is generated. 7. Payment history is updated.
Exceptions	Payment failure
Post Conditions	Payment complete

Use Case ID	PM-05
Use Case Name	Update Drama Calendar
Primary Actor/s	Production Manager
Description	Modify event calendar
Pre-Conditions	Drama calendar exists
Main Scenario	1. Production Manager opens the “Drama Calendar” section. 2. Selects an existing event or creates a new one. 3. Enters event details (e.g., technical setup, transport schedule). 4. Submits the update. 5. The system validates the entry and checks for conflicts. 6. If valid, updates the calendar. 7. Participants (e.g., Director, Artists) are notified.
Exceptions	Invalid dates
Post Conditions	Calendar updated

8.3.4 Service Provider

Use Case ID	SP-01
Use Case Name	Create Service Account
Primary Actor/s	Service Provider
Description	Service provider registers
Pre-Conditions	Provider is not already registered
Main Scenario	1. User navigates to the registration page. 2. Selects “Register as Service Provider.” 3. System displays the registration form. 4. User enters required details (business name, email, contact, service types). 5. User submits the form. 6. System validates the input. 7. If valid, account is created and stored in the system. 8. A confirmation message is displayed.
Exceptions	1. Email in use 2. Invalid data
Post Conditions	Account created

Use Case ID	SP-02
Use Case Name	Login
Primary Actor/s	Service Provider
Description	Service provider logs in
Pre-Conditions	Provider has an account
Main Scenario	1. Service Provider navigates to the login page. 2. Enters email and password. 3. Clicks “Login.” 4. System validates credentials. 5. If valid, a session is created. 6. Service Provider is redirected to their dashboard.
Exceptions	Wrong credentials
Post Conditions	Logged in

Use Case ID	SP-03
Use Case Name	Logout
Primary Actor/s	Service Provider
Description	Logs out from platform
Pre-Conditions	Logged in
Main Scenario	1. Provider clicks the “Logout” button. 2. System ends the session. 3. Provider is redirected to the login screen.
Exceptions	Session expired
Post Conditions	Logged out

Use Case ID	SP-04
Use Case Name	Manage Availability
Primary Actor/s	Service Provider
Description	Set service availability times
Pre-Conditions	Logged in
Main Scenario	1. Provider navigates to the “Availability Calendar.” 2. Selects dates and times for availability. 3. Enters availability details (e.g., service type, time slot). 4. Submits the availability schedule. 5. System validates the format. 6. Availability is saved to the provider’s profile.
Exceptions	Service already listed
Post Conditions	Services listed

Use Case ID	SP-05
Use Case Name	List Available Services
Primary Actor/s	Service Provider
Description	Add services offered
Pre-Conditions	Logged in
Main Scenario	7. Provider accesses the “My Services” section. 8. Clicks “Add New Service.” 9. Enters service name, category, and description. 10. Submits the form. 11. System validates and stores the service listing.
Exceptions	Service already listed
Post Conditions	Services listed

Use Case ID	SP-06
Use Case Name	Set Product Prices
Primary Actor/s	Service Provider
Description	Add pricing for services
Pre-Conditions	Service is listed
Main Scenario	1. Provider goes to “My Services.” 2. Selects a service from the list. 3. Clicks “Edit Price.” 4. Enters pricing information (e.g., fixed rate or hourly rate). 5. Submits the updated pricing. 6. System validates the data and saves it.
Exceptions	Invalid input Price outside allowed range.
Post Conditions	Price saved

Use Case ID	SP-07
Use Case Name	View Calendar
Primary Actor/s	Service Provider
Description	View upcoming bookings.
Pre-Conditions	Provider has accepted requests.
Main Scenario	1. Provider navigates to the “Bookings Calendar.” 2. System loads the scheduled bookings. 3. Provider browses calendar events with details such as time, location, and client. 4. Can filter by date or status (confirmed/pending).
Exceptions	No bookings found
Post Conditions	Booking list shown

Use Case ID	SP-08
Use Case Name	Manage Profile
Primary Actor/s	Service Provider
Description	Edit service provider info
Pre-Conditions	Provider logged in
Main Scenario	1. Provider opens the “Profile” section. 2. Clicks “Edit Profile.” 3. Updates fields such as name, contact info, logo, and description. 4. Submits the changes. 5. System validates and saves the profile.
Exceptions	1. Required fields missing. 2. Invalid image or file uploads.
Post Conditions	Profile updated

Use Case ID	SP-09
Use Case Name	Get Notifications
Primary Actor/s	Service Provider
Description	Receive alerts on service requests
Pre-Conditions	Provider logged in
Main Scenario	1. System generates a new notification (e.g., new service request). 2. Notification appears in the provider's dashboard or inbox. 3. Provider clicks on the notification to view details.
Exceptions	Notification system down
Post Conditions	Alerts received

Use Case ID	SP-10
Use Case Name	Accept/Reject Requests
Primary Actor/s	Service Provider
Description	Service provider reviews and responds to service requests (e.g., lighting, costume, makeup, etc.) made by the director or admin.
Pre-Conditions	Requests must exist and be assigned to the service provider.
Main Scenario	1. Service provider logs into the system. 2. Service provider navigates to the "Requests" section. 3. System displays a list of pending requests. 4. Service provider reviews request details. 5. Service provider selects either "Accept" or "Reject." 6. System updates the request status and notifies the requester.
Exceptions	1. Request already processed 2. System failure during status update
Post Conditions	Request is either accepted or rejected, and the requester is notified accordingly.

8.3.5 Artist

Use Case ID	ART-01
Use Case Name	Register
Primary Actor/s	Artist
Description	Artist registers an account on the platform
Pre-Conditions	Artist is not already registered
Main Scenario	1. Artist navigates to the registration page. 2. Selects “Register as Artist.” 3. Fills in required fields (name, email, password, phone, etc.). 4. Submits the registration form. 5. System validates the data. 6. If valid, an account is created and stored. 7. A confirmation message is displayed.
Exceptions	1. Email already registered 2. Missing or invalid fields
Post Conditions	New artist account is created

Use Case ID	ART-02
Use Case Name	Login
Primary Actor/s	Artist
Description	Artist logs into the system
Pre-Conditions	Artist has a valid account
Main Scenario	1. Artist opens the login page. 2. Enters registered email and password. 3. Clicks “Login.” 4. System verifies credentials. 5. If valid, a session is created. 6. Artist is redirected to their dashboard.
Exceptions	1. Invalid credentials 2. Account locked
Post Conditions	Artist is authenticated and redirected to dashboard

Use Case ID	ART-03
Use Case Name	Logout
Primary Actor/s	Artist
Description	Artist logs out from the system
Pre-Conditions	Artist is logged in
Main Scenario	1. Artist clicks the “Logout” button. 2. System ends the current session. 3. Artist is redirected to the login page.
Exceptions	Session timeout before manual logout
Post Conditions	Session is terminated

Use Case ID	ART-04
Use Case Name	Manage Profile
Primary Actor/s	Artist
Description	Artist manages their profile (create, edit, delete)
Pre-Conditions	Artist is logged in
Main Scenario	1. Artist navigates to the “My Profile” page. 2. Clicks “Edit Profile.” 3. Updates personal details (e.g., bio, photo, skills). 4. Clicks “Save.” 5. System validates and stores the changes.
Exceptions	1. Missing required fields 2. Unauthorized edit/delete
Post Conditions	Profile is updated accordingly

Use Case ID	ART-05
Use Case Name	Create Drama
Primary Actor/s	Artist
Description	Artist initiates a new drama project
Pre-Conditions	Artist is logged in
Main Scenario	1. Artist goes to the “Create Drama” page. 2. Enters drama details (title, genre, summary). 3. Uploads the necessary verification documents. 4. Submits the form for approval. 5. System stores the data and sends it for admin verification. Upon approval, drama is active.
Exceptions	1. Missing fields
Post Conditions	Drama is created

Use Case ID	ART-06
Use Case Name	View Calendar
Primary Actor/s	Artist
Description	Artist views the schedule and events
Pre-Conditions	Artist is logged in
Main Scenario	1. Artist accesses the “Calendar” section. 2. System loads all events relevant to the artist. 3. Events are displayed in calendar format with color coding.
Exceptions	None
Post Conditions	Calendar is displayed

Use Case ID	ART-07
Use Case Name	Apply to Roles in Dramas
Primary Actor/s	Artist
Description	Artist applies for roles
Pre-Conditions	Drama and roles exist
Main Scenario	1. Artist browses available drama roles. 2. Selects a role to view its details. 3. Clicks “Apply.” 4. Fills in any optional application details. 5. Submits the application. 6. System records the application and notifies the Director.
Exceptions	Missing fields
Post Conditions	Application is recorded

Use Case ID	ART-08
Use Case Name	View Employed Dramas
Primary Actor/s	Artist
Description	View list of dramas artist is cast in
Pre-Conditions	Artist has roles
Main Scenario	1. Artist navigates to “My Dramas.” 2. System loads assigned or accepted roles. 3. Artist clicks a drama to view more information.
Exceptions	No roles assigned
Post Conditions	Dramas list displayed

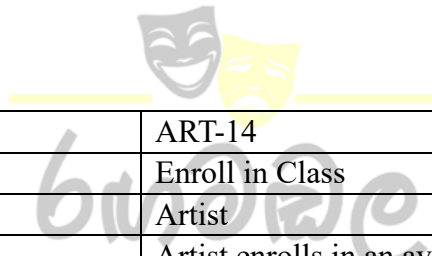

Use Case ID	ART-09
Use Case Name	Receive Notifications
Primary Actor/s	Artist
Description	Artist receives system notifications
Pre-Conditions	System generates notifications
Main Scenario	1. System sends notifications (e.g., new role request, rehearsal update). 2. Artist is alerted via email. 3. Artist clicks on notification to view details.
Exceptions	Notification delivery failure
Post Conditions	Artist is informed

Use Case ID	ART-10
Use Case Name	View Rehearsal Schedules
Primary Actor/s	Artist
Description	Artist views rehearsal timeline
Pre-Conditions	Rehearsal events exist.
Main Scenario	1. Artist navigates to “Rehearsal Schedule.” 2. System displays a calendar or list of rehearsal events. 3. Artist clicks an event for full details.
Exceptions	No rehearsals scheduled
Post Conditions	The timetable is shown

Use Case ID	ART-11
Use Case Name	Upload Portfolio
Primary Actor/s	Artist
Description	Artist uploads profile materials.
Pre-Conditions	Artist is logged in
Main Scenario	1. Artist navigates to the “Portfolio” section. 2. Clicks “Add Media.” 3. Selects file(s) from device. 4. Enters title or description. 5. Submits the upload. 6. System validates and stores media files.
Exceptions	File size/type error
Post Conditions	Portfolio is saved

Use Case ID	ART-12
Use Case Name	Accept/Reject Drama Role Requests
Primary Actor/s	Artist
Description	Respond to drama invitations
Pre-Conditions	Requests have been sent by director
Main Scenario	1. Artist navigates to “Role Requests.” 2. View the list of pending role invitations. 3. Clicks a request to see details. 4. Clicks “Accept” or “Reject.” 5. System updates request status and notifies the Director.
Exceptions	Response deadline passed
Post Conditions	Role request status is updated

Use Case ID	ART-13
Use Case Name	Create Class
Primary Actor/s	Artist
Description	Artist creates and schedules a class or workshop for other artists or learners.
Pre-Conditions	Artist must be logged in and have permissions to create a class.
Main Scenario	1. Artist navigates to the “My Classes” or “Create Class” section. 2. Artist clicks on “Create New Class.” 3. Artist fills in class details (title, description, date/time, location, max participants, etc.). 4. Artist submits the class form. 5. System validates and saves the class. 6. Class is published and becomes visible to potential participants.
Exceptions	1. Missing required fields 2. Invalid date/time 3. System error while saving
Post Conditions	New class is added to the system and listed under available classes.

Use Case ID	ART-14
Use Case Name	Enroll in Class
Primary Actor/s	Artist
Description	Artist enrolls in an available class or workshop.
Pre-Conditions	Class must be active and have available slots
Main Scenario	1. Artist navigates to the “Available Classes” section. 2. Artist browses or searches for a class. 3. Artist selects a class and clicks “Enroll.” 4. System checks for availability. 5. System confirms enrollment and updates participant list. 6. Artist receives confirmation message.
Exceptions	1. Class is full 2. Enrollment deadline passed 3. System error during enrollment
Post Conditions	Artist is successfully enrolled in the class, and seat count is updated.

8.3.6 Audience

Use Case ID	AUD-01
Use Case Name	View available dramas
Primary Actor/s	Audience
Description	Audience views dramas available
Pre-Conditions	None.
Main Scenario	1. Audience visits the drama page. 2. System displays available dramas. 3. User clicks on a drama to view more details. 4. Redirects to the related drama page.
Exceptions	Network error
Post Conditions	Dramas displayed

Use Case ID	AUD-02
Use Case Name	Buy Showings
Primary Actor/s	Audience
Description	Audience selects and views showtimes
Pre-Conditions	Showtimes must be available
Main Scenario	1. Audience navigates to the “Dramas” section. 2. Selects a drama from the list. 3. System displays details including available showtimes. Audience selects a showtime. 4. System notifies the production manager
Exceptions	Times not available
Post Conditions	Showtimes shown

Use Case ID	AUD-03
Use Case Name	Rate Dramas
Primary Actor/s	Audience
Description	Registered users rate a drama
Pre-Conditions	User is registered and logged in
Main Scenario	5. Audience logs into the system. 6. Navigates to “My Bookings” or directly to a drama page. 7. Clicks “Rate this Drama.” 8. Selects a star rating (e.g., 1 to 5 stars). 9. Optionally writes a comment or feedback. 10. Clicks “Submit Rating.” 11. System stores the rating and updates the average.
Exceptions	Already rated
Post Conditions	Rating submitted

Use Case ID	AUD-04
Use Case Name	Enroll in Class
Primary Actor/s	Audience
Description	Audience members can enroll in classes or workshops conducted by artists to learn about acting, stagecraft, or other drama-related topics.
Pre-Conditions	1. Audience member must be registered and logged in. 2. The class must be open for enrollment.
Main Scenario	1. Audience member logs into the system. 2. Audience navigates to the “Available Classes” section. 3. Audience browses through the listed classes. 4. Audience selects a class and clicks on “Enroll.” 5. System checks for available slots. 6. System processes the enrollment and confirms the registration. 7. Audience receives confirmation notification..
Exceptions	1. Enrollment deadline passed 2. Class is full 3. System error during enrollment
Post Conditions	Audience member is successfully enrolled in the selected class, and the participant count is updated.

8.4 Quality Attribute Requirements

8.4.1 Usability

Rangamadala targets a wide range of users from the Sri Lankan drama community — including artists, directors, production managers, service providers. Since many of these users are not highly technical, the system will prioritize a clean, intuitive, and user-friendly interface. Artists and directors will be able to perform tasks such as profile management, role application, and drama creation with minimal effort. Tooltips, clear navigation, and feedback messages will enhance usability. A simple user guide will be provided for complex features like drama verification and production coordination.

8.4.2 Security

User authentication will be implemented using secure password hashing mechanisms. User data such as certificates and artist profiles will be protected against unauthorized access.

8.4.3 Availability

As a web-based platform, Rangamadala is designed to be accessible 24/7 from any device with internet access. To maintain high availability:

- Hosting will use a reliable cloud service with minimal downtime.
- Basic failover and error handling mechanisms will be incorporated.

8.4.4 Performance and Reliability

To ensure a smooth experience:

- Static resources will be cached where possible.
- Backend operations (e.g., role applications, drama creation) will be optimized using efficient database queries and indexed fields.
- Transactions such as hiring and booking will be atomic and consistent to prevent data errors or loss.

8.4.5 Maintainability

Rangamadala will follow clean code principles and modular architecture. All components will be well-documented and structured to allow easy updates and debugging. Version control using GitHub will be implemented for collaboration and tracking. This ensures that future teams can extend or modify the system without major rework.

9 Technologies to be Used

Main Technologies

- User interface and User Experience (Frontend) - HTML, CSS, JavaScript
- Backend Development – PHP
- Database Management – MySQL

Other Technologies

- Web server – Apache
- Editors – Visual Studio
- Version control system – Git/Git Hub
- Design tools – Draw.io, Figma
- Documentation – Microsoft Word, Google Docs, Google Drive

10 Project Timeline

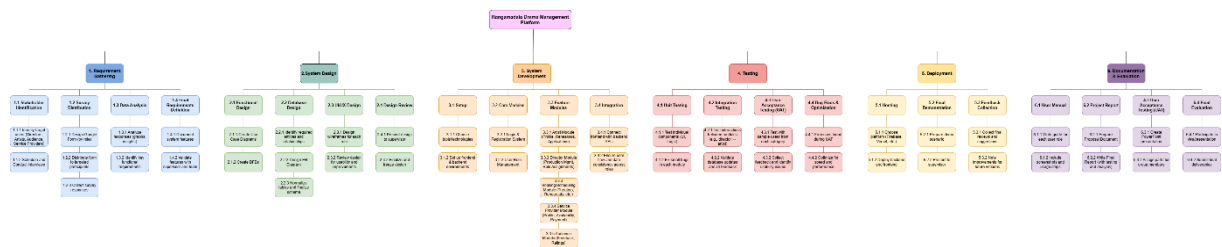

Below is a Gantt chart of the proposed timeline for the project.

For a detailed breakdown of project activities, timelines, and dependencies, please refer to the Gantt Chart provided in the [Excel document](#).

Task	June				July				August				September				October				November				December				January				February				March				April

Below is the Work Breakdown Structure (WBS) for our project. It outlines the major tasks and phases required for successful completion. The WBS helps ensure that all work is organized, assigned, and managed effectively throughout the project timeline.

Please refer to the chart attached to this [link](#).

11 Declaration

We as members of the project titled **Rangamadala**, certify that we will carry out this project according to the guidelines provided by the coordinators and supervisors of the course as well as we will not incorporate, without acknowledgment, any material previously submitted for a degree or diploma in any university. To the best of our knowledge and brief, the project work will not contain any material previously published or written by another person or ourselves, except where due reference is made in the text of appropriate places
